Unicom

Web designer

Working on small static websites from design to implementation. Extremely challenging environment with high turnaround.

As my first full time position I learned and developed my skills on the job and introduced web standards to the business which were quickly endorsed by the team.

University Saint Charles, Aix-Marseille II
France

interests

Passionate about the web in general, I am also a gadget addict and Japanese culture enthusiast. Music plays a big part in my life as well. I used to play in a rock band for five years as a drummer. I now enjoy playing Djembe, a type of African drum, and going to electro parties in the heart of Manchester.
